

## Theoretical Immunology Group Resources :: Metaserver

text size

*T T T T*

Metaserver is an MHC class I epitope prediction program which utilises [NetMHC](#) and [NetCTL](#), a collaboration between CBS and IMMI.

Please use the following reference when using this service:

T-Cell Epitope Prediction: Rescaling Can Mask Biological Variation between MHC Molecules.

MacNamara A, Kadolsky U, Bangham CRM, and Asquith B.

**PLoS Computational Biology** 5(3); Mar 2009.
